About me

- Front-End Developer with 5+ years of experience, specializing in WordPress, Angular, and Strapi. Extensive experience in web development, customization, and API integration. Currently pursuing a postgraduate degree in Cybersecurity, incorporating cybersecurity best practices to enhance application security. Additionally, expanding knowledge in Data Engineering to improve system scalability and integration.

Professional Experience

VRAUU ENERGY DRINK | FULL STACK DEVELOPER | DEC 2023 – PRESENT

- Developed and maintained the company's e-commerce and other websites, focusing on performance optimization and user experience. Utilized WordPress, WooCommerce, HTML, CSS, JavaScript, and integrated Bling API for inventory management and invoice generation.
- Managed infrastructure on Linux servers, including hosting administration, domain configuration, CPanel setup, backups, and server migrations, ensuring stability and security.
- Conducted usability, performance, and security testing across all software implementations, ensuring compliance with industry best practices.
- Implemented security best practices at all development levels, protecting against common vulnerabilities like XSS, CSRF, and SQL Injection.

SOMOS | FRONT-END DEVELOPER | 2021 – 2023

- Developed and customized over 30 WordPress websites, including low-code core customizations, Elementor PRO, WPML, SEO tools integration, Google Analytics, and Facebook Pixel.
- Created a full-stack automated application using Strapi as CMS, integrated with Angular, Ionic, and technologies like TypeScript, HTML, and SASS.
- Managed websites on WP Engine, including backups, staging environments, and page cloning, optimizing workflow efficiency.
- Developed an internal automation tool, allowing the team to create landing pages autonomously using a custom CMS, eliminating developer dependency.

PICCOLI BAMBINI | WEB DESIGNER | 2020 – 2021

- Developed a WordPress website using Elementor, integrating JavaScript, HTML, CSS, and PHP to ensure a responsive and user-focused experience.
- Designed promotional materials for the company's social media, focusing on audience engagement and attraction.
- Customized WordPress themes and optimized site performance, ensuring speed and accessibility.

Key Projects

MyDieselClaim

Built using WordPress, developed dynamic and responsive forms, and implemented SEO best practices and performance optimization.

[View Project](#)

CasoInglesMariana

Developed an institutional website providing legal case information about the Mariana tragedy, focusing on data clarity and accessibility for victims.

[View Project](#)

Case Management System (PogustGoodHead)

Developed an internal system for managing client cases related to the Mariana dam disaster, using Strapi as CMS to organize and manage legal process data.

[View Project](#)

PogustGoodHead

Developed the corporate website for a law firm, including management system integration and custom functionalities for displaying cases and legal information.
